

# What it holds and what survives a defence rewrite

| it holds                                                                                                        | after a rewrite            |
|-----------------------------------------------------------------------------------------------------------------|----------------------------|
|  its objective                  | survives                   |
|  what it can see of the network | recomputed, and can shrink |
|  the hosts it has taken         | survives                   |
|  the credentials it has taken   | survives                   |

## Procedure its six states, and the moves between them
